**Tiny Toons: Buster & the Beanstalk – (G) – Edutainment**

Help your Tiny Toons friends, Buster Bunny and Plucky Duck, unravel kooky clues and recover stolen treasures from the notorious giant in the delightfully tongue-in-cheek version of the classic fairy tale. Features original character voices from the Tiny Toons Adventures Television series.

GT7128 Tiny Toons: Buster & the Beanstalk (Mac/Win) \$19.95

**Freddi Fish And The Missing Kelp Seeds – (G) – Edutainment**

Grandma Grouper's kelp seeds are missing and without them all of the sea creatures will go hungry! Good thing Freddi Fish and her finny friend Luther are on the case! Through underwater caves, deep canyons, colourful reefs and more, kids will be immersed for hours in this bottomless adventure of fun, friends, discovery and learning.

GT7118 Freddi Fish & Missing Kelp Seeds (Mac/Win) \$19.95

**Hansel & Gretel And The Enchanted Castle – (G) – Edutainment**

When you play this game, you actually participate in Hansel and Gretel's imaginative journey into an adventure filled with danger and surprise. The abandoned children must escape from the wicked witch's castle. Come and explore the most uplifting interactive adventure you will ever see...and a world you will never want to leave!

GT7474 Hansel & Gretel & Enchanted Castle (Mac/Win) \$19.95

**Pajama Sam: No Need To Hide When Its Dark Outside – (G) – Edutainment**  
There's no reason to be afraid of the dark, as Sam's about to find out. Fed up with his fear of the dark, Sam transforms himself into Pajama Sam – world's youngest superhero – and resolves to confront Darkness!

GT7120 Pajama Sam: No Need To Hide/Dark (Mac/Win) \$19.95

**Putt Putt Saves the Zoo – (G) – Edutainment**

Today's the grand opening of the Cartown Zoo and there's still so much to do: Zoo chow's running low and all the baby animals are missing! "Putt-Putt Saves the Zoo is probably the best kids' CD-ROM game on shelves today. No, really. In an industry full of dreck and coasting on hype, the story of Putt-Putt ... and his dog Pep will restore your faith in new media." – Newsweek

GT7122 Putt Putt Saves the Zoo (Mac/Win) \$19.95

**The Smelly Mystery – (G) – Edutainment**

More than just an interactive storybook ... it's a mystery adventure/game that only YOU and Little Monster can solve! Mrs. Yallypappus is terribly upset to discover that some of the smells in her kitchen have been switched: the orange juice smells like the peanut butter! Even worse, the smell switching has spread all over the town of Monsterville! See if YOU can help them find out whodunnit!

GT7124 The Smelly Mystery (Mac/Win) \$19.95

**SPY Fox In Dry Cereal – (G) – Edutainment**

Help SPY Fox – the super-smooth secret agent who finesses his way through SPY Corps' toughest assignments – thwart William the Kid's dastardly cow-napping plans! "SPY Fox is as addictive as popcorn; this clever and funny spy mystery will engage your family for hours." – Family Channel Seal of Quality, USA Today

**GAMES AND EDUTAINMENT**

**Asteroids – (G8+) – Arcade – June!**

In 1979, it was the great 20-cent escape. In 2000, repressed asteroid-destroying addictions will not be escaped when the legendary Asteroids hits again in 3-D! Introducing the next-generation of the most addictive arcade game known to mankind. – (G8+) – Strategy

GT7607 ○Asteroids \$73.50

**Age of Empires – (G8+) – Strategy**

Age of Empires is conquering your Mac! Choose from one of eight classic civilizations and bring your tribe from the Stone Age to the Iron Age. Harvest wood, gold, stone and food to supply your troops and finance research into new technologies as you play against the computer through varied scenarios or on randomly generated maps, or take on your friends over a LAN or the Internet, with up to eight players in a single network game (network play is Mac-to-Mac only). Additionally, Age of Empires allows you to create your own scenarios and trade them with your friends. Create new challenges and relive the glories of past empires!

GT7158 Age of Empires \$94.50

**America's Greatest Arcade Hits 3D – (G) – Arcade**

Four Amazing 3D Games! Munch Man – only you can keep him alive and munching in this 3D rendition of an all-time arcade favorite! Tetramadness – Line up the geometric shapes in rows and clear them before the pieces pile up. Alien Invaders – watch out! They'll use their arsenal of powerful weapons to destroy you at all costs! Qube Jumper – complete each level by jumping on the blocks and changing their colour. Make sure to look before you leap; snakes, frogs, and other vicious enemies are determined to get you any way they can!

GT7192 America's Greatest Arcade Hits 3D \$41.95

--------	-------------------	---------

**Myth II : Soulbrighter – (MA15+) – Strategy**  
In Myth II destruction reigns supreme. Castle walls will crumble under a barrage of Dwarven mortar fire. Drawbridges will lower before your besieging army. Flaming arrows will rain down from battlements, lighting the ground beneath you. Myth II: Soulbrighter is a unique strategy game, set in a 3D world of dangerous alliances and ancient evil, where all beings tremble before the wrath of Soulbrighter, cruelest and most cunning of the evil Fallen Lords.

GT7317	Myth II (Mac/Win)	\$83.95

Over 35 unique arenas – a Nali galleon ship, Egyptian tombs, submarines, speeding trains, floating castles and more! The most comprehensive and challenging online multiplayer experience ever — take on 'bots' and humans in new games like Capture the Flag, Assault, Domination, and new Deathmatch variations. Take control of the game. Train for combat in Novice mode. Go Hardcore for more speed, more danger and way more intensity. All-new and enhanced bog-body count weaponry designed to send giblets flying! Design your own teammates with competely configurable bots so smart, you'll swear they are human! Whether you're a novice or a hardcore 3D shooter - the tournament you've been waiting for has arrived!

GT7150 Unreal Tournament \$94.50

**ALADDIN TUNER 3.0**

Aladdin Tuner offers the most complete solution available for anyone interested in listening to music on their Macintosh. In addition to live Internet content, Aladdin Tuner allows users to play MP3 files and CDs. In partnership with CDDB, Inc., Aladdin Tuner gives users access to the largest available database of CD track and title information; simply insert a CD and Aladdin Tuner will retrieve information about the music as it plays the CD. Aladdin Tuner offers users access to more than 3,400 streaming audio and video broadcasts on the Internet. In addition to RealAudio(r) and RealVideo(r) streams, Aladdin Tuner adds support for streaming QuickTime(tm) and the Windows Media player format, making it the most complete resource for live Internet content available. The Aladdin Tuner database is automatically updated, ensuring that it evolves as new Internet broadcast sites become available (customers may offer additions too).

ALA026 Aladdin Tuner \$43.50

### DISKEXPRESS PRO 3.0.2

DiskExpress Pro keeps your hard disk running at peak performance. Now accelerated for Power Mac and MacOS 8 compatible, DiskExpress Pro provides a more informative graphical disk display, animated optimisation progress display, integrated disk analysis tools, new optimisation schedules and customisation for each volume PLUS it works with any size volume. It works in the background to keep the hard disk running at optimum performance by storing your most frequently used files (and programs) together. Because it's fully transparent, it intuitively works around your busy schedules without tying up your computer. DiskExpress Pro can be interrupted at any time with no risk of scrambling any information. It is the greatest transparent disk defragmentation and optimisation utility for your Macintosh!

Currently, DiskExpress Pro will not optimise an HFS+ volume, however, it is compatible with MacOS 8.6

### DISK QUOTA 6.1

For years, AppleShare administrators have yearned for a system to automatically enforce limits on the amount of disk space users can have on a server. Now, with Disk Quota, an administrator can easily set up such limits for each user on each AppleShare server, without having to continually monitor disk usage and notify users when they have exceeded their limits.

This version is for use with AppleShare 6.1. Please contact us if your client is running an earlier version of AppleShare.

**DISKWARRIOR 2.0**

DiskWarrior is the highest rated Mac disk repair utility ever. It repairs disks that no other program can repair. Now with DiskShield, DiskWarrior can prevent damage to your disks before it occurs! DiskWarrior's exclusive and innovative DiskShield provides nonstop protection for your disks. It makes sure that your directories are both updated and error-free. DiskShield checks the validity of any data being written to the directory to prevent errant programs from destroying your directory. It also checks the validity of any directory data read from your disks to alert you of any existing directory damage and to prevent the damage from escalating. Furthermore, DiskShield keeps the directories on your disks updated so that a crash or loss of power won't cause a loss of data. With DiskWarrior's nonstop disk protection, you may never experience disk damage again. DiskWarrior is not a disk repair program in the conventional sense. Instead of patching the original directory, it quickly builds a new directory using data recovered from the original directory thereby recovering files and folders that you thought were lost and that no other program could recover. DiskWarrior knows that the most important thing when you are attempting to repair your disks is getting your data back. That's why it first scavenges your old directories to find all the file data it can and then uses it to build entirely new directories. DiskWarrior is the only program where there is never a risk of losing directory data and thus never a risk of losing access to your files. Only DiskWarrior has all of these features: \* Preview mode to view what the disk will look like after the directory is rebuilt, allowing you to test files, folders, and applications before any directory changes are written to disk \* Uses directory data to quickly rebuild the directory structure \* Eliminates risk of losing access to files. Other disk "repair" utilities attempt to fix directories by patching directory structure and risk deleting sections of the directory \* Scavenges directory data to find all salvageable file and folder data, even those contained in damaged nodes \* Eliminates unseen directory errors, preventing minor directory errors from escalating into major problems \* Recovers lost files and folders \* Optimizes directories for maximum directory performance, speeding up overall disk performance \* Designed to safely permit interruptions of any kind, including power outages \* Advanced "Verify Reads and Writes" technology to protect your data \* Support for bad block sparing software \* Can rebuild disks as large as 2,000 gigabytes (2 terabytes) \* Accelerated for Power Macintosh \* Compatible with OS 9.

**DRAGSTRIP 3.7.1**

DragStrip, the Ultimate Desktop Organiser, allows you to launch, find, organise and access applications and documents quickly and efficiently. Say goodbye to cluttered desktops and digging through browser windows to find what you are looking for. With a simple drag-and-drop interface, you can create desktop strips of files, folders, applications and URLs that you access frequently and keep them all just a click away. With this powerful tool you can store and access all kinds of information and files (including pictures, text, and QuickTime movies) via convenient strips that are similar in appearance and functionality to the Mac's standard Launcher. DragStrip also supports DragStrip Additions, plug-in modules that add features to your copy of DragStrip. For example, there are additions that allow you to change monitor depth, play a CD, and check the current date and time on your Macintosh right from your desktop. And of course, DragStrip is scriptable via AppleScript.

ALA017	DragStrip Activation Code	\$32.50
--------	---------------------------	---------

NOTE: DragStrip can be obtained from [ftp://ftp.pica.com.au](http://ftp.pica.com.au). On purchase, an activation code is supplied that will activate the software. Disks and packaging are not supplied with this product.

**DROPSTUFF**

Easily create plain or self-extracting Stuffit archives from the Macintosh Finder. Will even BinHex files after stuffing. Stuffit Expander for Mac users: Add the Expander Enhancer that comes with DropStuff and Stuffit Expander is PowerPC accelerated, expands more formats (including .tar), and joins Stuffit segments.

ALA013	DropStuff 5.5 With Expander Enhancer (Mac)	\$68.00
--------	--	---------

Aladdin DropStuff for Windows compresses files with either Windows or Macintosh-standard compression (.zip and .sit). Aladdin DropStuff will compress a file or folder into a compressed archive by a factor of as much as 98% (average 50%) of its original size; compression level varies depending on the file-type. Aladdin DropStuff allows Windows users to create Stuffit-compressed files for communication with Macintosh users.

**DropStuff Windows**

ALA014	DropStuff 5.0 Windows	\$41.50
ALA020	DropZip for Windows	\$35.00

NOTE: DropStuff can be obtained from [ftp://ftp.pica.com.au](http://ftp.pica.com.au). On purchase, a serial number is supplied that will activate the software. Disks and packaging are not supplied with this product.

**FAXSTF PRO 6.0**

FAXstf Pro has raised the standard for fax communication software. It offers an elegant new interface to simplify fax management and has been designed from its inception to take full advantage of the power of PowerPCs. It allows you to fax from any application using a Browser interface which is unique in its simplicity and intuitiveness, yet is powerful and robust. Full Drag and Drop support makes fax management simple. FAXstf Pro allows users to send faxes from within most DeskTop applications such as Microsoft Office 98. FAXstf can deliver faxes to any fax machine or computer. Powerful features include fax markup, a cover page editor, calling card support, broadcasting to an unlimited number of recipients, AppleScripting for fax processing and Caller ID support. FAXstf Pro supports over 400 different modems and includes STF standard features of QuickNote, Smart Dialing, background imaging, Fax scheduling, superior gray scale of 256 shades of gray and the ability to combine faxes.

**Compatible with Mac OS 9!**

SM01	○ FAXstf Pro 6.0	\$155.00
SM01U	○ FAXstf Pro 6.0 Upgrade From FAXstf 3.2	\$94.00
SM01U1	○ FAXstf Pro 6.0 Upg (All Other Versions)	\$109.50

**FLASHBACK 1.1**

FlashBack is an automatic safety net for all of your Macintosh files. It falls in between traditional back-up software and file recovery utilities to provide an entirely new kind of file safety net. FlashBack allows users to easily access from one to 99 previous versions of any saved file. This new form of backup can be applied to any type of file. It functions by tracking the changes made to a file each time the file is saved (whether by an auto-save feature or by user command). Changes are maintained in the FlashBack application for each saved version by a time and date stamp. At any time in the future the user can double click on any previous version and FlashBack instantly re-creates the file as it was at the time and date indicated.

ALA010	FlashBack 1.1 Mac/Win	\$76.50
--------	-----------------------	---------

**FONT EXPLOSION 1,000 CD**

**MACDRIVE 2000 (WIN 95/98/NT)**

MacDrive 2000 is the ultimate way to use Macintosh disks with Windows systems! With MacDrive 2000 installed on your Windows system, you can access files on Mac format disks of any kind directly from the desktop, Explorer and your favorite software. Because MacDrive 2000 makes Mac disks work transparently, you can copy, open, save, delete and rename files on Mac disks anytime. So, it's not only a great way to get Mac files to Windows – it's also a great way to get Windows files to a Mac. There's nothing to configure and nothing new to learn—it just works. It reads writes and formats Mac disks (both HFS & HFS Plus), installs in minutes and works with floppies, Zip, Jaz, ORB, SyQuest, hard drives, CD-ROMs, multisession CD-Rs and more. No wonder Macworld magazine called MacDrive "The Mac-disk-mounting utility of choice" in their June '98 issue!

**MONARCH 5.0**

Monarch reads report files that are ordinarily sent to a printer to produce hardcopy. Monarch displays a softcopy of the report on screen with live data you can access and manipulate. There's no re-entering data manually and no waiting for IT to provide a custom data extract. None of that. Monarch can read report files produced on any mainframe, midrange, client/server or PC system. It makes no difference how, when, or where the report was created. All you need is access to report files across the network or via terminal emulation software. Or, get the files on a diskette - pop it in! Monarch requires Windows 95, 98 or NT.

Please call us for pricing.

**PHOTOFRAME 2.0**

PhotoFrame 2.0 gives you the edge—now there's no limit to the dramatic border effects you can design for your images. Customise and combine any of the included 1000+ edge effects, or use Instant Frame and Instant Edge to design your own frames. Go beyond the ordinary with special effects like shadows, glows, textures, bevels. Set blur, noise, opacity and blend modes to take your frames into another dimension. The streamlined user interface adds dockable palettes, putting all controls just a mouse click away. Real-time previews and interactive controls let you design as you go. Experience instant satisfaction—you get the effect you want when you want it.

### PHOTOGRAPHICS 1.0.1

PhotoGraphics puts your favorite illustration tools right inside Photoshop, giving you a full featured set of drawing and advanced text capabilities. Drawing tools let you illustrate within Photoshop with object-level fill, stroke, opacity and anti-aliasing. The full-featured set of drawing tools includes line, pen, rectangle, ellipse, polygon and starburst. Other editing features include layers, object-level opacity, color palette import and export, dockable palettes, rulers, guides and more! Superior text controls let you create and re-edit type on a path, right within Photoshop. You can even set multiple text blocks on the same path with independent control over placement and formatting of each text block. Additional text formatting options not found in Photoshop include character style sheets, individual character color, super and subscript, all caps, small caps, full justification, and horizontal and vertical scaling. All formatting including baseline shift, kerning, tracking and leading can be applied with standard keyboard shortcuts.

### PLUSOPTIMIZER 1.2

PlusOptimizer is a new utility from Alsoft, the authors of DiskExpress Pro – it keeps your hard disks running at peak performance by defragmenting your files and free space. PlusOptimizer optimises both HFS (Mac OS Standard) and HFS Plus (Mac OS Extended) disks under Mac OS 8.1 – 9.0. It's incredibly easy to use – simply select a disk, graph the disk to see the current amount of fragmentation and click a button to optimise your disks. It uses the same technology found in PlusMaker and DiskExpress Pro to give you the utmost in safety and security of your data. Like PlusMaker and DiskExpress Pro, PlusOptimizer can handle interruptions of any kind without compromising your data. Compatible with OS 9.

PlusOptimizer is now included FREE with DiskWarrior and is no longer available as a stand-alone product.

### PORTFOLIO 5.0

Portfolio lets individuals, workgroups or enterprises manage digital assets in visual catalogues. Its new client/server capabilities provide fully scalable asset management for enterprises. Advanced features include scripting for unlimited automation and workflow integration, publishing catalogues on the Web, slideshows and importing fields from other databases. Build visual catalogues automatically with detailed reference information and thumbnail images. Organise volumes of digital media, including images, sounds, movies and whole documents. Catalogue any media regardless of application and then effortlessly retrieve visually or by a keyword. Stay in sync, share your catalogues over networks and across platforms. Portfolio's diverse feature set keeps you in control of all of your media so that you or your workgroup stays more productive and more creative. Portfolio 5 includes PortWeb to make searchable catalogues available on the internet.

#### Portfolio Browser

Portfolio now includes a freely-distributable read-only browser. After you create your catalogues, you can put them on a CD with the browser and distribute them to customers, vendors, family members, et cetera. The recipient doesn't even need to install anything—they just insert the CD, run the browser and start looking at your catalogue! The free browser comes bundled with Portfolio, or you can download it from our web site.

#### Portfolio Server 5.0

Portfolio Server distributes digital assets to workgroups or enterprises with fully scalable client/server strength. Advanced features include scripting for unlimited automation and workflow integration, publishing catalogues on the Web, slideshows and importing fields from other databases. Can be inserted into any Portfolio 4.0 workgroup without repurchasing clients. Includes Portfolio Web Edition and five Portfolio clients.

EX37	○Portfolio 5 Server Mac/Win NT	\$5,155.00
EX37E1	○Portfolio 5 Server Educ Mac/Win NT	\$2,600.00
EX37E1SN	○Portfolio 5 Server Educ Mac/Win NT S/No.	\$2,600.00
EX37U	○Portfolio 5 Server Upgrade Mac/Win NT	\$2,060.00

#### Portfolio Server SQL Connect

Add Portfolio Server SQL Connect to provide connectivity with existing SQL databases, for much larger, more powerful databases. Supports Microsoft SQL Server 6.5 and 7 and Oracle 8i.

EX38	○Portfolio 5 SQL Connect	\$15,970.00

### PREFLIGHT PRO 2.1.1

Extensis Preflight Pro is the advanced prepress solution that tracks down and solves workflow problems before they happen. It quickly identifies and solves prepress problems, eliminating incomplete files and wasted film. Preflight Pro's easy to use, intuitive Job Jacket interface makes it easy to check your documents and take corrective action before output. Automatically inspect your documents and then print a report. If all is in order, use Preflight Pro's Collect For Output feature; if not, the Pilot feature will take you directly to the document and suggest possible solutions. Preflight Pro's robust feature set dramatically improves your preflight workflow saving you time, materials and money. Preflight Pro works with QuarkXPress, PageMaker, Illustrator, Photoshop, Creator 2 and Acrobat PDF.

### PRINT EXPLOSION 1.0

Print Explosion is the fun and easy-to-use graphics studio designed exclusively for the Macintosh. Looking for the perfect greeting card, sign, banner or other unique item? Let Print Explosion show you the way with more than 4,000 professionally-crafted designs, 50,000 clip art images and 500 fonts. Now it's easy to create truly stunning projects with that special personalised touch, saving time and money in the process. You can do it all without ever leaving your Macintosh. Print Explosion's easy-to-use interface will guide you through the process from concept to finished product in a matter of just minutes! Print Explosion is ideal for first-time publishers and professional designers alike because it contains rich graphics, layout features and text effects not found in many programs at ten times the cost. Best of all, because Print Explosion was designed by Macintosh users for Macintosh users, you'll always feel right at home as you turn out sensational projects.

### PRIVATE FILE 2.0

Private File is the easiest way to protect a user's sensitive information for secure transmissions over the Internet (via e-mail, FTP sites, Web sites, etc.). Private File uses powerful 40-bit encryption to encrypt files and folders and is as easy to use as Drag and Drop! The Private File hybrid CD provides the option of installing Windows 95/NT and/or Macintosh versions for each license and allows you to install the software on two machines.

*Note: Requires the latest StuffIt Deluxe for compatibility with the latest Mac OS.*

ALA011	Private File Mac/Win	\$87.50

**QX-EFFECTS 3.0.2**

Extensis QX-Effects 3.0 helps you quickly create professional looking visual effects directly in QuarkXPress with less time and effort. No mess, no fuss. Construct high-quality shadows, bevels, glows, or embosses with just a few clicks, without ever leaving QuarkXPress. Simple, intuitive controls allow you to interactively preview and select each effect's shape, shadow angle, blur, color, contrast and more. Merge the effect seamlessly with background text or images of several file types, even when rotated or flipped. No more switching among applications, recreating and importing files. With just a few clicks, QX-Effects untangles the path to stunning effects, saving you time.

**QX-TOOLS 4.0.2 (FOR QUARKXPRESS 4.0.X)**

Extensis QX-Tools 4.0 is specifically designed to increase the versatility of QuarkXPress 4.0 enabling users to experiment freely while maximising design efficiency. Features in QX-Tools 4.0 include: QX-VectorEdit which allows users to open and edit in QuarkXPress any artwork that can be printed, such as MS-Word tables, Excel charts, PDF files, EPS files, and Adobe Illustrator and Macromedia FreeHand artwork. QX-Scaler allows users to resize groups of QuarkXPress objects by percentage, measurement or click-and-drag, with unlimited undo. QX-Layers is similar to the 'layers' capabilities in other graphic applications, users can create, modify, delete and add objects to layers. QX-FindChange allows the user to instantly search for object attributes such as trapping, color or frame thickness and replace them with new specifications. QX-ItemStyles makes it easy to create and apply style sheets to objects for faster formatting. QX-FineTune allows users to adjust specific design elements quickly and visually, such as for paragraph rules and indents. QX-Viewer-Users can instantly navigate through documents via a full-color, multi-page preview of the current document. QX-Palettes reduces screen clutter allowing palettes to 'dock' to each other and other industry standard palettes.

**REDWING 1.0.2**

Redwing, the new Adobe Acrobat plug-in from Datawatch, is designed to precisely extract text and tables from even the most complex, compound PDF documents with 100 character accuracy and 99.99 feature accuracy. Redwing provides a handy zoning tool that allows you to pick out just the text and tables you need, and even lets you sequence and edit text, tables, footnotes and titles so they all go in the right place and in the right order. PDF data can be exported to a variety of formats, including word processing, spreadsheet, database or even Datawatch's Monarch - making it possible to perform sophisticated data analysis and validation over data held in PDF files.

**SHRINKWRAP 3.5.1**

ShrinkWrap is a utility that can quickly and easily turn a disk into a file. The file can then be transmitted electronically (via the Internet, etc.) and just as quickly returned to an exact disk image of the original source disk. ShrinkWrap supports all of the commonly used image file formats. Features include recreating the exact icon placement, appearance of all windows and the correct name of the disk. It also has Read/Write/Mount support for Apple's NDIF (New Disk Image Format) compressed images. Asynchronous floppy support, caching disk-to-disk duplication on the hard drive to minimize ejects, automatic BinHex encoding, the ability to create/read/write disk image files and, on the fly Stuffit compression and decompression. ShrinkWrap is the ideal method of distributing disk images over the Internet.

ALA012	Shrinkwrap Serial Number	\$54.50

**SOUNDJAM MP PLUS 2.1.1**

SoundJam MP Plus is currently the only full-featured, all in one, player and encoder that allows Macintosh users to create MP3 files from audio CDs, records and tapes and then download the songs to portable audio players such as the Rio 500™, the Nomad II™ and I-Jam. SoundJam MP Plus features \* Enhanced encoding and conversion: MP3 encoding is optimised for Power Mac G4 with Velocity Engine. \* Record from Sound Input: Transfer your record albums, cassettes, CDs, 8-Tracks, and voice, directly into MP3, MP2, or AIFF files using the sound input jack of your computer. \* Playlist Composer: Suit your music to your mood. SoundJam MP Plus will automatically set up playlists of your choice: Jazz?—you've got a Jazz playlist: Classical?—you've got it; Acid Rock?—yeah man! Mix them up?—you're the boss! SoundJam MP Plus will scan your playlists and pick and choose exactly what you want. \* Karaoke mode: Reduce the vocals in most of your MP3 songs. Now you and your friends can sing along to your hearts' content. \* Alarm Clock: Use SoundJam to lull you to sleep, or to wake you up in the morning. SoundJam doesn't even need to be running for the alarm clock to work! \* CDDB Submission: CDDB is the CD Database of files on the Internet that SoundJam MP Plus references to allow you to display the names of your albums, the artists, and their songs right on the screen as your CD plays. If you have a CD that is not in the CDDB database, be a hero and submit it! And much, much more! Compatible with OS 9.

CG40	○SoundJam MP Plus	\$145.00

**SUITCASE 9**

The new font management features in Suitcase 9 make it easier than ever to locate, organise and quickly activate fonts. Keep your System up to speed by opening only the fonts you need when you need them. New features include the ability to create type sample pages from the main window and print out a font chart for the font set. You can also preview your fonts in four different ways including: alphabetically, QuickType(tm), in a paragraph, and a waterfall, making it easy to preview fonts as you select them. You can now easily add fonts from the Finder and build sets. You can organise fonts by project for increased speed and efficiency. Includes three FREE connections to the Suitcase Server which works with Suitcase to ensure that members of a workgroup have access to the same set of fonts. Also includes Suitcase 8 XT – A QuarkXTension that opens needed fonts on-the-fly, eliminating missing font dialogs and saving time creating and outputting QuarkXPress files and, Suitcase 8 MenuFonts – Organises and displays fonts in their own type style and groups them by families in menus. Fully compatible with Mac OS 9.

**SUITCASE SERVER**

Make Sure Everyone Uses The Same Fonts! Stop running around with a floppy full of fonts! Suitcase Server makes sure that everyone in your design workgroup is using the same fonts. And it's easy to set up and use—most designers won't need to learn anything new! When two or more designers work on one document or related documents, it's essential that they are using the same fonts. Suitcase Server uses Client/Server technology to ensure that the proper fonts are available to everyone. Avoid document reflow! Suitcase Server is designed to be really easy to use! It will run on just about any Power Macintosh, uses a measly 10 megabytes of RAM, and can be installed in five minutes. Members of a workgroup using fonts maintained by Suitcase don't have to know that they are part of a design workgroup at all. Remote design groups can use dial-up Internet connections to synchronize fonts, then disconnect and keep working. Fonts aren't opened across the network, so designers are secure from server crashes. Better yet, Suitcase Server will reduce network activity, which results in increased stability! The workstation side of the Extensis Suitcase Server is just like Extensis Suitcase, with one new dialog. Designers don't need to learn a new way of using fonts, they don't need to go to the network to search for fonts, and installation is automatic. Quit fooling around with fonts, and get back to creating masterpieces!

Note: Each workstation requires a copy of Suitcase 8.1 or later (sold separately)

**SUNDIAL**

Take a break from the work day and reconnect to nature with Sundial, a fun, relaxing way to tell time! Sundial scenes change every five minutes and are synchronised to the current time, so you can enjoy the day as it slowly progresses. In addition, using a state-of-the-art software algorithm, Sundial adjusts each movie so that sunrise and sunset coincide exactly with the actual events outside your window, every day of the year. Having Sundial on your computer is the next best thing to being outdoors! Sundial movies come on CD-ROM in high-quality 24bpp color in three different sizes (640x480, 832x624, and 1024x768) for maximum display quality on different monitor sizes. The movies have a new image every 5 minutes for an entire 24 hours and the transition between the images is smooth and virtually instantaneous. Each volume contains 24 hours worth of images from 10 breathtaking scenes, which you can preview in seconds prior to selecting your favorite scene.

**TOTAL VIRUS DEFENSE**

TVD includes: VirusScan Desktop Protection, NetShield Server Protection, GroupShield Groupware Protection, WebShield Internet Gateway Protection and Management Tools. VirusScan provides comprehensive, multi-platform protection for desktop clients. VirusScan offers industry-leading virus detection and removal and ensures that all viruses, both common and newly discovered, are detected and eliminated prior to infecting multiple users. NetShield efficiently detects, in real-time, virus infected files transmitted to and from the server in order to prevent the spread of viruses throughout the network. NetShield also scans, either on-demand or on a scheduled basis, for viruses being stored on the server. Once an infected file is detected, it can be automatically cleaned, quarantined or deleted. Additionally, when a virus is located, administrators can be alerted immediately via a network message, SNMP trap, MHS message, alphanumeric pager and/or trouble ticket sent to a printer. GroupShield for Lotus Notes/Domino and GroupShield for Microsoft Exchange deploy Network Associates' advanced scanning technology at the server level to stop viruses before they are distributed to, or passed on by users. Because GroupShield is on the server, users cannot disable scanning and inadvertently allow infected files to spread. WebShield products stop virus infections at the gateway level. A WebShield SMTP and WebShield for MS Proxy scan all important gateway traffic to detect and clean all types of viruses. Management Tools – keeping track of anti-virus software can be a job in itself. These tools provide enterprise-wide distribution and configuration of anti-virus software and updates. Scalable from a few workstations to thousands, Management Tools makes the hard work of safeguarding a network easier to manage.

**VIRUSSCAN 5.0**

McAfee's Macro Hunter and ViruLogic technology safeguard your PC from ALL virus types and from ALL potential sources: floppy disks, e-mail attachments, shared files, online services, internet downloads, networks, CD-ROM. Analyses Microsoft Word and Excel macros, seeks and destroys unidentified macro viruses and repairs files automatically! The VirusScan technology features groundbreaking detection from destructive ActiveX and Java applets often downloaded without your knowledge while you're browsing. The VirusScan software's advanced e-mail X-Ray feature catches viruses in Internet mail even before new messages have been opened. Viruses never reach your system! Works with cc:Mail, Eudora, Microsoft Exchange and Outlook. Now you can safely and easily isolate infected and suspicious files in a protected area on your computer. By quarantining an infected file you can take the time to repair it, without worrying about spreading the infection to other files on your system or emailing it to friends, family and co-workers. You can even submit a suspicious file to McAfee AVERT Labs for testing and personalized diagnosis. Fast and Easy Updates: Prepare your PC to fight off new viruses. VirusScan software provides true incremental updating allowing users to quickly and easily update their virus protection at the click of a mouse.

Includes versions compatible with Windows 98, Windows 95, NT (workstation only) 3.51 & 4.0, 3.1x, DOS and OS/2

NA26	VirusScan v5.0 Deluxe	\$108.90
------	-----------------------	----------

**VIRUSSCAN SECURITY SUITE**

The VirusScan Security Suite includes: VirusScan, NetShield and Management Tools. VirusScan provides comprehensive, multi-platform protection for desktop clients. VirusScan offers industry-leading virus detection and removal and ensures that all viruses, both common and newly discovered, are detected and eliminated prior to infecting multiple users. NetShield efficiently detects, in real-time, virus infected files transmitted to and from the server in order to prevent the spread of viruses throughout the network. NetShield also scans, either on-demand or on a scheduled basis, for viruses being stored on the server. Once an infected file is detected, it can be automatically cleaned, quarantined or deleted. Additionally, when a virus is located, administrators can be alerted immediately via a network message, SNMP trap, MHS message, alphanumeric pager and/or trouble ticket sent to a printer. Keeping track of anti-virus software can be a job in itself. That's why there's Management Tools, which allows enterprise-wide distribution and configuration of anti-virus software and updates. Scalable from a few workstations to thousands, Management Tools makes the hard work of safeguarding a network easier to manage.

Use WinFlow to produce top-quality diagrams fast – without tedious drawing. Present your company's organisational structure or design and document the flow of a manufacturing process. Link a subchart and pages of text comments to any symbol. Included are more than 400 ANSI-standard and custom symbols. Even "teach" symbols how you would like them to scale, to handle text, etc. Turn almost any graphic into a smart symbol with intelligent attachment points. Develop any overall view of work, project, or logic flow in just minutes! No other flowcharting method offers the ease-of-use, speed, and outstanding flexibility of WinFlow. Charts created with WinFlow are file-level compatible with MacFlow and vice versa.

MY13	WinFlow 5	\$325.00
MY13E1	WinFlow 5 Education	\$205.00
MY13U	WinFlow 5 Upgrade	\$185.00

Please call us for pricing on multi-user versions for education or corporate use.

**EXTENSIS VOLUME LICENCE PROGRAM**

The Extensis Volume Licence Agreement (VLA) is designed for large clients who wish to purchase more than ten copies of an Extensis Product.

**How it works**

Find the recommended retail price (RRP) in the matrix below for the Extensis product your customer is interested in. Multiply the RRP for that product by the appropriate discount level (# of units the customer would like to buy). The price you calculate is the price you should quote to the customer. Your cost per unit is the customer price less 20% for direct sales.

*Suitcase Server is the exception to this rule. The price for any quantity of connections (users) is \$65.00 per user with your price at \$52.00 per connection.*

**The Discount Structure (Off Retail Prices above)**

For example: Your customer is interested in 38 copies of Suitcase 9. Suitcase 9 has a retail price of A\$199 per unit. The price you should quote to your customer is A\$199 x .65 (35% off) = A\$129.35 per unit. The total cost to the customer is A\$4,915.30. Your discount is 20% off the license price of \$129.35, so your cost is A\$103.48 – \$3,932.24 for the total license. To order, you will need to fax a copy of your customer's P.O. and a copy of your P.O. PICA Software will deliver one set of media (CD), documentation and one serial number for the number of users licensed.

**The Retail Prices**

EX20VLA	BeyondPress 4.0 Mac/Win VLA	\$640.00
EX12VLA	Collect Pro Mac VLA	\$240.00

EX34VLA	Suitcase Server VLA 1 User ** No Discounts **	\$70.00

Continued Next Column

**EXTENSIS VOLUME LICENCE PROGRAM CONTINUED**

The Discount Structure (Off Retail Prices Above)

- 10 to 24 Users – 30%
- 25 to 49 Users – 35%
- 50 to 99 Users – 40%
- 100 to 249 Users – 45%
- 250 to 499 Users – 50%
- 500+ Users – 55%

The customer receives one set of master disks (CD) and documentation. Each package is custom built, so please allow up to three days for delivery.

**TERMS AND CONDITIONS**

**60 Day Money Back Guarantee**

PICA Software covers all products with a 60 Day Money Back Guarantee. If not completely satisfied, return the undamaged package to place of purchase for a full refund (excludes site licenses, serialised updates and delivery or handling charges).

**Returned Goods**

Returns may be accepted for all products excluding serialised updates. Goods returned to PICA Software will only be accepted when identified with a return authorisation number obtained from PICA Software. Return Authorisations are valid for a period of two months and goods will not be accepted after this time. All goods being returned for credit must be in an undamaged condition and, accordingly, it is the responsibility of sender to ensure that the goods are appropriately packaged for shipment. PICA Software will not accept responsibility for goods damaged in transit. PICA Software reserves the right to return damaged goods to the sender without notification. Importantly, the issuing of a Return Authorisation number does not automatically entitle the receiver to a credit – the goods will be checked and the request evaluated before a credit is raised. Return freight is the responsibility of the sender.

**Payment Terms and Title**

Terms are strictly payment prior to delivery unless a credit facility has been established. Payment may be made by cash, cheque, credit card or direct deposit. Clearance of cheques is required prior to despatch of goods. Notwithstanding delivery of the goods by PICA Software, the goods shall remain the property of and be owned by PICA Software until payment has been made in full.

**Turnaround and Shipping**

Generally if an order is received before 3pm and the goods are in stock they will be despatched that afternoon. If we are unable to ship any part of your order within three days then we will contact you with an estimated delivery time.

Unless otherwise specified, goods will be shipped by Ansett Air Freight Off-Peak Service where goods are normally delivered 2 to 3 days from the shipment date to all capital cities and most regional centres. If an overnight service is requested, and available to your location, you will be charged at PICA Software's scheduled rate. The receiver will incur the shipping charges. As shipment is F.O.B from PICA Software, insurance is the responsibility of the receiver.

**DOMESTIC**

Melbourne metro \$11 up to 15Kg, country and interstate \$11 up to 3Kg, \$16.50 up to 5Kg, above 5Kg at PICA Software's scheduled rate. In the case of a split shipment, freight will be charged only once on the first part of the shipment.

**INTERNATIONAL**

New Zealand freight charges (Carrier: WARDS) are \$18 up to 500g and \$1 for each 100g thereafter. Charges will be \$23 for up to 1Kg, \$28 for up to 1.5Kg, \$33 for up to 2 Kg and \$3.50 for each 500g thereafter.

**Price List**

Prices listed in this price list are effective as at the date specified. Due to fluctuations in international exchange rates, supplier pricing and product changes etc, prices and specifications are subject to change without notice except where a written quotation has been provided.
